

P3

ADAPTIVE

**Disrupting the consulting paradigm,
one client at a time.**

Power Platform has no equal, and neither do we. P3 Adaptive is the first (and the best) consulting firm solely built around the value of this new wave of tools and focused on rapidly delivering impactful solution to provide maximum ROI to our clients.

PLAN . DEPLOY . SCALE

The last Power Platform Partner you will ever need.

We believe in rapid innovation and intuitive dashboards that drive action. We ALSO believe those solutions should be finished in record time and delivered to you right the first time. Let's work together and achieve more with better data, better decisions & better consultants.

It's possible to be good AND fast.

Because we remove the waste and friction from the process, you get both quality and speed - rather than sacrificing one for the other.

Everything you need; nothing you don't.

We don't pitch you on nimble projects only to push expensive infrastructure once we have our foot in the door.

We win when you win.

We treat every engagement like it's an audition for the next one.
We work our brains hard in the service the delighting you.

A Refreshing Approach

Impact-Driven

Improvement is the goal, not merely being informed. We quickly digest what your business needs to achieve, and work backwards from that goal.

Open

You are also kept educated on how your project actually works, so if you need modifications later, you have the option to make them yourself.

Transparent

No surprises: you are always in the loop, and get to watch your project advance in real-time. No waiting in suspense to see what you're paying for.

Compressed

Weeks of requirements gathering are no longer needed. Our proven approach cuts to the chase: we're often halfway done when others would still be writing specs.

Getting Started with P3 Adaptive

Contact us

Schedule a consultation call with P3 Adaptive so we can understand the client's needs to transform existing solutions into impactful results.

Development Work

Magic happens. We build in a day what takes others weeks allowing clients to find hidden opportunities quickly.

Reviewing for Success

We exceed our clients wildest expectations and together we ensure your team is equipped to take it from here.

The Payoff

Engage, improve, impact, repeat. We provide a legendary experience for all of our clients so they can plan for their next win.

Get Started

Our Project Methodology

Align

The face-to-face "mind meld." Conversation, Sketches, and whiteboards replace expensive and ineffective requirements docs.

Assemble

The fun part. You won't believe how much a report or app can develop even in a day, or how much undiscovered opportunity lay in wait.

Assess

Are there things you'd like to refine or add? Are you positioned to take it from here? These are the questions, but there will be no mysteries.

Activate

The payoff. Put your new reports (or other outputs) into circulation. Monitor engagement, improvement, and impact. Plan your next win.

We've trained hundreds of organizations of all sizes.
Here are just a few...

Power BI Training

Don't waste time with subpar training.

We deliver the absolute best trainings in the business. Because nothing is more valuable than your time.

Learn about our public training classes or schedule a private training event for your team.

PROJECT TRAINING

Instructor Led Training

P3 Adaptive offers the most engaging, hands-on, and instructor-led training program available for Power BI. Our robust curriculum covers foundational to advanced skill levels across a variety of topics.

2-Day Courses:

- Power BI Foundations
- Power BI Advanced
- Power BI Governance and Adoption

Level Up Series:

- P3 Workshop Day
- Power Query
- Visualization and Storytelling

Project Jumpstart

With your end goal in mind, our team works quickly & diligently to improve processes, create actionable insights and easily customizable dashboards in order to share results transparently and in real-time.

Our projects begin with an intensive, rapid results 3-day consulting engagement. We can deliver this engagement onsite at your location or virtually.

Case Study: Kuraray

How Kuraray Turns Data into Decisions

As they continue searching for a limit to Power BI's capabilities, Siepelinga's team has now set an ambitious goal: to eliminate all manual reports and use Power BI as the only source of information.

The Podcast with the Human Element

Raw Data by P3 Adaptive

Our clients tell us that we're more fun to work with than your average consultants. So we decided we needed a "Mullet Strategy." Business in the front, party in the back.

Join us as we bring together developers, designers, end users and experts of the Power Platform.

Listen in every Tuesday to get the inside scoop from the greatest minds within the data community. Each week, our new guest shares their data origin story to help enrich the industry and provide insight into the personal, professional, and educational impact of data. Hosts Rob Collie and Thomas LaRock chat with guests from all backgrounds, from the highest levels of Microsoft to the casual end users.

All levels of data greatness are reflected in our guest list. Don't miss a single episode!

Tangible results in weeks, not months

Honest, effective & ready to work with you

Why does choosing a consulting have to feel risky? It's natural to need some outside help, but too often, consultants use their expertise as a smokescreen, and an excuse to lead you down a wasteful path. Yuck.

At P3 Adaptive we are 100% committed to transparency, speed, and ridiculous ROI – yours, not ours.
